

Changes for EasyAudit 2011/12

Based on “Audit technical specification 2011/12 v1.9”

V5.0.1.37

Changed the way the latest DB update works because of a bug in access. You may have received an error message like...

V5.0.1.36

Minor fix for episode export to word for non-audited episodes. I introduced a pop-up dialog which has now been removed.

V5.0.1.35

Minor fix for table4 vs table7 discrepancy in PbR 2011 for secondary diagnosis.

V5.0.1.34

- PbR report : Table 2
 - Headings change
- PbR report : Table 7
 - SpellLOS counts spells and spell errors

Based on “Audit technical specification 2011/12 v1.8”

V5.0.1.33

- PbR report : Table 2
 - Spell Data differences were incorrectly including some HRG changes.

V5.0.1.32

- PbR report : Table 7
 - Corrected SpellLos totals across the line rather than just final figure!
- Added complete audit check to test for empty error keys – which would reflect episodes that need checking and re-saving after upgrading from version V5.0.1.19 or earlier for SpellLOS errors.

V5.0.1.31

- PbR report : Table 4
 - UTA counts incorrect
 - Missing column
- PbR report : Table 7
 - SpellLOS counts weren't added into final total
 - UTA counts incorrect
- PbR report : Table 8 – fixed error counts

V5.0.1.30

- PbR report : Table 2
 - Fix for double count of data / coding errors
- PbR report : Table 7
 - SpellLOS counts weren't added into sub-total

V5.0.1.28

- PbR report : Table 2
 - change to allow double count of data / coding errors
 - heading correction episode => spell
- Select only data errors – was missing SpellLOS errors

V5.0.1.27

- Support for 1.8 version of PbR.
 - New Episode & Spell LOS error keys
 - New UTA keys
 - Errors no longer count UNK keys.

Based on “Audit technical specification 2011/12 v1.3”

V5.0.1.19

- Possible incorrect count in table 1
- count of data errors now exclude UTA in technical appendix
- added table 7 – overall (totals) in PbR 2011 report

V5.0.1.18

- Corrected merge export where clinic text contained commas
- Corrected merge import not setting LOS/Age values
- Added a fix for this to tools – validate DB
- Corrected Regroup to use correct schema

V5.0.1.15

- Corrected a V4 format load issue
- Reordered the “Other” date lines to match the “core tab” ordering
- On completing an audit
 - check for any UZ codes
 - check for data differences not marked with errors
 - check for partial spells
- Added new “e” column for data errors

V5.0.1.10

Loading new data

- To load data
 - New the audit
 - Browse for the file
 - Search for the provider or type it in
 - Click Load
 - Check for errors
 - Check for validation messages – sample data had warnings
- File Format
 - You can specify V4 or V5 format
 - Or Auto – if PbR & V44 are chosen EasyAudit will use new V5 data format

Worksheet

- New tab “Other” next to Coding at top of worksheet

- Age based on Episode Start Date – not Admission Date
- Red indicators show potential errors – green no errors
- You can copy dates from current episode
- AdmiDate will be copied to all episodes in spell – you only need to enter once
- DisDate will be copied to all episodes in spell – you only need to enter once
- EpiStart – needs to be entered for every episode
- EpiEnd – needs to be entered for every episode
- DOB only needs entering once per patient
- Age (at start of episode) – needs checking for every episode
- LOS - needs checking for every episode
- If any of the Age/LOS/Admitype/Sex are red but don't have an error key – you will be prompted on save

Exported Worksheet

- Has new data items age, los, admission method, sex (not dates though)
- New right click menu option

Summary Reports

- New menu option “2011 PbR Summary”, also right menu click.
- Table2: column1: %Spell HRG/Price change due to coding, column2: %Spell HRG/Price change due to data, column3: %Spell price change
- Technical Appendix: Money figures have a leading £

Archive

- New archive format
 - V44 will output new format
 - Any other HRG version will output old format

Other Changes

- Backup no longer saves an extra copy in the support area
- Merge now available without completing audit
- Added a right click menu to audits list – not much in it yet
- Added a right click menu to episodes list – not much in it yet

V5.0.0.0

New version number 5.0.X.X

- A new registration key will be required – please send an email through to the support desk support@woodwardassoc.co.uk with your username and we will send you a V5 key by return email.

Loading new data

- Added an ignore duplicates option when loading data.
- Re-organised the screen into basic & advanced settings
- Replaced “summary as themed area” with Mode selection

Worksheet

- Added tooltip to coding clinic button
- Moved admission method to the core data
- Reduced the font size
- Show the supplied trust LOS and calculated (used) LOS – green if match , red if not.
- Can now choose audit keys with keyboard (F2, then Alt+DownArrow)
- Row ordering - swap two rows – available for a while but undocumented
 - Grab the audit code and drop it above / below another code
- Delete entire audit row and move up other codes – available earlier but undocumented
 - Shift + Delete (DEL) key
- Manual entry mode
 - Fixed tab sequence
 - Allows typing codes with verification
 - Backspace / Ctrl+backspace deletes current code
 - Keyboard F2 edits current code
- Show the supplied STARTAGE and calculated (if DOB supplied) green if match , red if not.
- Uppercases codes on entry
- Allows completed audit records to be viewed.

Codes

OPCS46 is supported in V44 algorithm.

Grouping Algorithm / Tariff

The application now supports local payment grouping and tariffs for the following years

11/12(HRG v4) - V44

10/11(HRG v4) - V43

09/10 (HRG v4) - V42

08/09 (v35)

07/08 (v35)
